## LANGUAGES:

- ENGLISH (B2, 82/100 EF\_SET)
- UKRAINIAN (NATIVE)
- POLSKI (B1 CERTIFICATED)
- ITALIAN (A1)

## WHAT DRIVES ME

I AM PASSIONATED TO BE A PART OF COMPANY THAT ALWAYS GROW AND DEVELOP NEW APPROACHES THAT`S GOING TO EASE PEOPLE LIVES, SUCH AS E-SERVICES AND APPS.

ON THE LAST POSITION I WAS WORKING AS A DEVELOPMENT TECH LEAD, BESIDE THAT I WAS INVOLVED INTO OTHER PROCESSES, INCLUDING FOLLOWING POSITIONS:

### 1) TEAM LEAD

I`ve started as a solo-team developer I`ve been working for 1 year 2 month (starting in 2020 December), but I`ve performed well through that, client`s were satisfied and company got more projects to do. Me as 1 person physically couldn`t make it, so I was promoted to tech lead role, including other responsibilities as team lead, technical recruiter and everything that could be possibly touched through the process of making a team from zero collaborating with CEO. Sometimes I even felt like one man army, due to responsibilities starting from technical recruitment of new team members, ending business side of things. For the first 6 month of tech leading I was involved into coding as well, after team went to 7+ members I was forced to switch from direct coding involvement into HR side of things to keep team motivated and well-maintained.

During the peak I`ve built a advanced workflow in order to improve the processes using SCRUM methodologies.

Workflow, team, processes and some of the standards were established by me still running until that day. More than 70 projects were released by my duty. 4 of them were the most complex and built with React and Node JS.

Term - 1 year 6 months

Skill level - ●●●●●●●●●●●●●●●●

### 2) Technical project manager

Term - 1 year 6 months

Skill level - ●●●●●●●●●●○

### 3) QA manual/code reviews

Term - 1 year 6 months

Skill level - ●●●●●●●●●●○

### 4) Wordpress / WooCommerce developer

Term - 2 year 7 months (for all time)

Skill level - ●●●●●●●●●●○
